beautiful teeth and

teeth that work beautifully

Nobel Biocare can help

Nobel Biocare has been dedicated to solving tooth problems for over 40 years. We've become world leaders in esthetic dentistry by developing optimized solutions to any problem you might face.

Now there's no need to worry, even if you're missing all your teeth. Nobel Biocare permanent implants are the brilliant alternative to dentures. They can replace everything you've lost – from a beautiful smile to normal chewing ability.

dental Implants – the modern solution

Dental implants caused a revolutionary change in dentistry. Implants are man-made replacements for the tooth roots that have been lost. They behave exactly like real roots – even bonding naturally with the jawbone. We call this 'osseointegration'.

Millions of people all over the world now enjoy Nobel Biocare Implants. This simple surgery can transform your confidence and improve your looks.

Everyone deserves trouble-free teeth and a beautiful smile. With these tremendous, recent advances in esthetic dentistry, there's no need to settle for anything less. Teeth on Nobel Biocare Implants look and work like your original teeth – often even better.

short surgery

Inserting Nobel Biocare Implants is usually quick and easy. There should be almost no discomfort.

eat straightaway

Your dentist makes it possible to have new, fully working teeth sometimes in as little as one hour.

perfect fit. perfect match

When coupled with Procera® Crowns and Bridges, your new teeth are almost impossible to distinguish from real teeth.

eat whatever you like

Implants are like natural teeth roots. They're strong, stable and secure, so you can comfortably eat all your favorite foods.

metal-free - for a beautiful smile

Nobel Biocare Procera® Ceramic Teeth are completely metal-free and will leave no ugly black lines.

keep looking younger

When you lose your teeth, your jawbone can shrink – making you look older. Implants help prevent this process.

a life-long solution

Nobel Biocare Dental Implants are a long-lasting solution – often for life.

a happier life

Beautiful new teeth can give you back the confidence you may have lost. They can really transform your daily life.

fixed bridge

Here's an example of how a dentist replaces missing teeth. In this case, a fixed Procera® Bridge – with all the teeth contained in one unit – is anchored to a few dental implants.

This course of treatment is just one of several options, so consult your dentist to find the best solution for your individual condition.

installing a fixed bridge on implants

- 1. beforehand** – The dentist makes a first examination and takes x-rays.
- 2. installing the implants** – This is normally done in a single session. Temporary teeth are attached so you can eat and function normally, while waiting for the permanent bridge.
- 3. attaching the bridge** – Implants usually need a month or two to integrate with the jaw. Once they've 'taken', the permanent bridge can be fixed to the implants.
- 4. the beautiful result** – Your new teeth should look and feel just like your natural ones. People will find it hard to tell the difference.

overdentures

Here's another example of how a dentist replaces missing teeth. In this case, with an overdenture – anchored to two dental implants. This is quite different from a conventional denture because it is permanently stabilized in the mouth.

This course of treatment is just one of several options, so consult your dentist to find the best solution for your individual condition.

installing an overdenture on implants.

- 1. installing the implants** – The first step is installing dental implants to secure the overdenture. Only two implants are needed.
- 2. attaching the overdenture** – The overdenture is securely fixed on top of the implants. They will be removable for cleaning and oral hygiene.
- 3. the beautiful result** – At last, there's no need to worry about a slipping, sliding or clicking denture. You're free to enjoy life.

“My greatest experience yet”

Birgitta had full dentures that unfortunately didn't fit her at all. The turning point came when Birgitta had dental implants installed. Full fixed bridges were fitted to both jaws. Birgitta was overwhelmed by the result. “It is fantastic to be able to feel such happiness at my age.” Birgitta says with great relief.

ask your dentist for

beautiful teeth now™

With Nobel Biocare Implants, you never have to be embarrassed about your teeth again. You can eat and behave completely normally.

In fact, new teeth can add more than looks and function to your life. Again and again, we find that a beautiful smile makes a difference to self-esteem. People who've changed from ordinary dentures to Nobel Biocare solutions describe their experience as immensely satisfying.

Ask your dentist about the ways in which Nobel Biocare can help you. Why wait to start smiling?
